PROFESSIONAL SUMMARY

Curious and detail-oriented data professional with over one year of experience spanning data engineering, machine learning and analytics within the fintech and mining sectors. Experienced in designing and maintaining data pipelines, developing and automating ETL workflows, building data marts, performing exploratory data analysis, and applying statistical modelling and machine learning techniques to solve business problems. Proficient in Python, SQL, PySpark and Microsoft Fabric, with exposure to predictive modelling, AI-driven solutions, workflow automation and data visualisation. Skilled in transforming complex datasets into reliable data assets, actionable insights and data-driven solutions that support operational efficiency and informed business decision-making.

CORE SKILLS

Programming: Python, SQL, PySpark, SAS

Data Engineering: Apache Airflow, Microsoft Fabric, Databricks, ETL, Data Pipelines, Data Marts, Microsoft Power Automate, Azure DevOps, WinSCP, Git, GitHub, Ubuntu Server (Linux)

Databases & Data Management: PostgreSQL, Microsoft SQL Server, SSMS, SSIS, SSAS, SSRS, BigQuery, DBeaver

Cloud & Business Intelligence: Microsoft Azure, Google Cloud Platform (GCP), AWS, Microsoft Power BI, Looker Studio, Microsoft Visio

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, NumPy, Matplotlib, Seaborn, Classification, Regression, Clustering, Deep Learning, Feature Engineering, Hyperparameter Tuning, A/B Testing, Hypothesis Testing, Predictive Modeling, Time Series Analysis, Model development, training & deployment Generative AI, NLP, LLMs, RAG, Microsoft 365 Copilot, Copilot Studio

WORK EXPERIENCE

Data Engineer | MTN MoMo (MTN Group Fintech) Dec 2025 - Present

- Build and maintain data pipelines and automation workflows enabling seamless data ingestion from source systems into Microsoft Fabric environment for analysis and reporting, reducing manual data processing by 100%.
- Architect and build data marts tailored to business requirements, improving query performance by 99% while delivering a single source of truth for key MoMo services and application performance metrics.
- Design and maintain interactive KPI dashboards for MoMo services and applications, translating operational data into actionable insights for technical and non-technical stakeholders.
- Automated the daily synchronization of 100+ files from remote SFTP server to staging environment using Batch scripting and WinSCP, improving data pipeline efficiency by 100%.
- Build Power Automate workflows to automate data movement, generate failure alerts and notify stakeholders, improving incident response times, operational efficiency and data availability by 95%.
- Built AI-powered agents using Microsoft Copilot Studio to query and retrieve insights from mobile money transaction data stored in Microsoft Fabric, improving data accessibility and information retrieval by 80%.
- Supported the deployment of production scripts across OpCos, ensuring consistent implementation of data quality dashboards, and validation rules for key MoMo services.
- Implement and enhance data quality checks, validation frameworks, monitoring and alerting mechanism to ensure data accuracy, completeness, timeliness and reliability above 95% while enabling proactive issue detection and resolution.
- Log, monitor and escalate data-related incidents through ServiceNow, coordinating with vendors to resolve missing or delayed data and minimize disruptions to reporting processes by 90%.
- Manage reprocessing of late-arriving and missing data files, ensuring 99% data availability and minimizing disruption to downstream reporting.

- Documented and maintained Low-Level Designs (LLDs), User Acceptance Testing (UAT) processes, Source-to-Target Mapping (STTM) specifications and data dictionaries, improving data consistency, transparency and governance by 90%.

Data Scientist | Mintek Jan 2025 - Nov 2025

- Developed and deployed machine learning models to optimize organizational operations, achieving up to 20% improvement through A/B testing, feature engineering and model optimization.
- Designed and maintained interactive KPI dashboards covering research outputs, HR metrics and divisional performance, reducing manual reporting time by 40%.
- Built and optimized ETL pipelines integrating data from multiple sources, including Azure Cloud, SharePoint, SQL databases and Excel, improving data consistency and reliability by 95%.
- Extracted, transformed and analyzed large-scale datasets using SQL, optimizing query performance while maintaining 99% data accuracy.
- Performed exploratory data analysis and statistical analysis to uncover actionable insights, supporting strategic decision-making and contributing to a 15% improvement in operational efficiency.
- Collaborated cross-functionally with team members to deliver data-driven recommendations, resulting in a 40% increase in operational efficiency.

EDUCATION

Bachelor of Science Honours in Computer Science, University of Limpopo Feb 2024 - Dec 2024

Bachelor of Science in Computer Science and Statistics, University of Limpopo Feb 2020 - Dec 2023

Matric, Kgagatlou Secondary School Jan 2015 - Dec 2019

CERTIFICATIONS & TRAININGS

Coursera: IBM Data Analyst Professional Certificate; IBM Data Science Professional Certificate; IBM Data Engineering Professional Certificate; IBM Machine Learning Professional Certificate; IBM Generative AI Engineering Professional Certificate; IBM AI Engineering Professional Certificate; AWS Cloud Practitioner Essentials

Udemy: Credit Risk Modelling & Credit Scoring Using ML; Microsoft Power BI: Beginner to Advanced; Complete Databricks & PySpark Bootcamp; Azure Data Engineering End-to-End; Databricks Certified Data Engineer Associate - Bootcamp

SAS: SAS Programming Essentials

EDUQE: Fintech AI Agent Builder - Microsoft 365 Copilot & Copilot Studio
